Accr No. 2736

Dear Mr Iruegas

Temporary Extension of Current Period of Accreditation:

Standard: ISO 15189:2012 - Medical Laboratories
Project Number: 100590-03-01
Project Name: 2013 - RA - Mexico - WRAP020381
Accr Exp Date: 28/02/2014

The expiry date for accreditation periods is set five months after the profiled month for annual assessments, unless we are able to renew the accreditation for another four year cycle. Our visits to your organisation are profiled for July and expiry of accreditation is therefore set at 31/12/2013. Unfortunately, because we could not carry out our reassessment visit until October, we will not be able to complete all of the necessary processes to renew your accreditation by that date. In view of this, an extension of the current period until 28 February 2014 has been approved, allowing sufficient time for all related processes to be completed. The temporary extension will not affect the expiry date for the next accreditation which, assuming renewal, will be 31 December 2017.

Please contact me if you have any queries about the above.

Your sincerely

John Abbiss
